Thanks Annie.

I certainly think this merits more investigation. Here is Kirkcaldy world-famous for its linoleum. and now Gordon Brown, and this other little gem in the background.

Not many people around to remember it!

I believe it was made in Kirkcaldy and distributed around the country, but perhaps it was only distributed to certain bakers under licence in 'DIY'kit form. Intriguing.

The booklet is no use to me personally, but may be of value to your local museum. I would appreciate it, if you would enquire. I think you will find your laptop very convenient, I have one. Very fiddly with the keys but I have attached a seperate keyboard, much faster.
